Critical

1

The owner of contract can to modify a 'tax fee', a 'burn fee' and a 'charity fee' to any percentage at any time

2

The owner of contract has ability to update fees x100 at any time

3

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

4

The includeAccount and the _getCurrentSupply functions for loop does not have accounts length limit, which costs more gas

We strongly recommend that BALLS conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
