

# Token Security Quick Audit

## For *Dexioprotocol*

0x29b1E39A529d3B3cacEA55989594F71813e998Bb

Instruments:

SWC-[100:136]

OWASP Risk Rating Methodology

## Audit Results

Risk Level:

Weakness

Low

**Medium**

High

Critical

1

DoS with Block Gas Limit

Consider removing the `includeInReward` and the `getCurrentSupply` functions

2

The owner can to modify a 'burn fee', a 'tax fee' and a 'liquidity fee' to any percentage at any time

3

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

4

The owner has the ability to use the lock function in order to set ownership to `address(0)` at any time

**We strongly recommend that Dexioprotocol conduct a Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem**
