

# Quick Audit Report

## For **DeFidoCoin**

0x305701961C6Be161191D4Af08fcddb7D162d6f7B

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]  
Common Weakness Enumeration [CWE]  
OWASP Risk Rating Methodology

## Audit Results

Risk Level:

Weakness

Low

**Medium**

High

Critical

1

The owner has the ability to use the lock function in order to set ownership to address(0) at any time

2

This can be used in a nefarious way by the project team to restore ownership and change fee structures

3

The owner of contract has the ability to set a max tax percentage and swap and liquify enable status

4

The `_getCurrentSupply` function for loop does not have accounts length limit, which costs more gas

**We strongly recommend that DefidoCoin conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem**
