1

The owner can to modify a 'tax fee', a 'buy fee', 'sell fee' and a 'liquidity fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner has the ability to use the lock function in order to set ownership to address(0) at any time

4

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

We strongly recommend that CoinCAS conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
