

# Quick Audit Report

## For *Mini Kishu Fomo*

0x15e272E072f89152605825220674b1fD96BCAd95

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]  
Common Weakness Enumeration [CWE]  
OWASP Risk Rating Methodology

## Audit Results

Risk Level:

Weakness

Low

Medium

**High**

Critical

1

The owner of contract can to modify a 'buyback fee', a 'liquidity fee', a 'dev fee' and a 'reflect fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner has the ability to change sell multiplier, max wallet and tax limit size

4

The process function for loop does not have accounts length limit, which costs more gas

**We strongly recommend that Mini Kishu Fomo conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem**
