

Quick Audit Report

For **Baby SuShi Token**

0x69035088699d462D741Caba6CD7786dB31e3f0dD

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

Weakness

Low

Medium

High

Critical

1

The owner of contract can to modify a 'liquidity fee', a 'pool fee' and a 'tax fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner of contract can exclude and include accounts from transfer fees and reward distribution at any time

4

The `_getCurrentSupply` and the `includeInReward` functions for loop do not have an accounts length limit, which costs more gas

We strongly recommend that Baby Sushi Token conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
