

# Quick Audit Report

## For **MoneyShot**

0xE73D249e9f82EFd2e0d8f2ec0dB1Da4597e39574

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]  
Common Weakness Enumeration [CWE]  
OWASP Risk Rating Methodology

## Audit Results

Risk Level:

Weakness

Low

Medium

**High**

Critical

1

The owner of contract can to modify a 'liquidity fee', a 'developer fee' and a 'tax fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

4

This essentially makes the token become a honeypot to that address, and makes transferring any native tokens impossible

**We strongly recommend that MoneyShot conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem**
