Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

Weakness

Low

Medium

High

Critical

1

The owner of contract can to modify a 'liquidity fee', a 'tokenrewards fee' and a 'marketing fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

4

This essentially makes the token become a honeypot to that address, and makes transferring any native tokens impossible

We strongly recommend that PuppyPal conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
