

# Token Security Quick Audit

## For **CoinCAS Token**

0xd5b1f8baB7afDbC11261188F48d102A0C5f09BE9

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]  
Common Weakness Enumeration [CWE]  
OWASP Risk Rating Methodology

## Audit Results

Risk Level:

Weakness

Low

Medium

High

**Critical**

1

The owner can to modify a 'tax fee', a 'buy fee', 'sell fee' and a 'liquidity fee' to any percentage at any time

2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3

The owner has the ability to use the lock function in order to set ownership to address(0) at any time

4

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

**We strongly recommend that CoinCAS conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem**
