# **Quick Audit Report**

## For Aurum

0x5b6AfBd5184638c9c49C485c3DE5ED56269ba6Cb

### Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]] Common Weakness Enumeration [CWE] **OWASP Risk Rating Methodology** 

## **Audit Results**

### **Risk Level:**

Weakness

Low

Medium

High

Critical

The owner can to modify a 'buyb fee', an 'operations fee', a 'BNB fee' and a 'liquidity fee' to any percentage at any time

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

This essentially makes the token become a honeypot to that address, and makes transferring native any tokens impossible

We strongly recommend that Aurum conduct Full Token Security Audit to control within the ecosystem as they have notable control within the ecosystem
