CHECK POINT

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

○ Weakness   ○ Low   ● **Medium**   ○ High   ○ Critical

1
We strongly recommend centralized privileges or roles in the protocol to be improved via a decentralized mechanism

2
The owner of contract can to modify a 'liquidity fee', a 'marketing fee' and a 'CAKERewards fee' to any percentage at any time

3
This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

4
PRADADividendTracker has the permission to call functions without obtaining the consensus of the community

We strongly recommend that PartyADA conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
