Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

# Audit Results

**Risk Level:**

○ Weakness   ○ Low   ○ Medium   🔴 **High**   ○ Critical

## 1

The owner can to modify a 'liquidity fee', a 'marketing fee' and a 'XTZRewards fee' to any percentage at any time

## 2

This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

## 3

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

## 4

The exclude 'Multiple Accounts From Fees' function for loop does not have accounts length limit, which costs more gas

We strongly recommend that FlyingTezos conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
