CHECK POINT

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

○ Weakness   ○ Low   ● **Medium**   ○ High   ○ Critical

1

The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

2

This essentially makes the token become a honeypot to that address, and makes transferring any native tokens impossible

3

The owner of contract has the ability to set max sell token

4

The transfer and the transferFrom functions for loop does not have accounts length limit, which costs more gas

We strongly recommend that FlokiWorld conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
