CHECK
POINT

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

Weakness	Low	Medium	**High**	Critical
○	○	○	●	○

1
The owner of contract can to modify a 'liquidity fee', a 'dev fee', a 'burn fee' and a 'tax fee' to any percentage at any time

2
This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

3
The owner of contract has the ability to use the lock function in order to set ownership to address(0) at any time

4
This can be used in a nefarious way by the project team to restore ownership and change fee structures

We strongly recommend that ZuckZilla conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
