Quick Audit Report

For *NFTGALAXY*

0x1A85b5a21d07A65d2026caB12ecBA8DFD58D2BC1

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

Weakness   Low   Medium   **High**   Critical

1
The owner can blacklist wallets from purchasing or selling the coins they hold. This might deter investors from purchasing the coin

2
The owner of the contract can lock any seller and set max sell token

3
Using the old version solidity (v0.6.12) don't prevent any compiler-level bugs

4
This essentially makes the token become a honeypot to that address, and makes transferring any native tokens impossible

We strongly recommend that NFTGALAXY conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
