CHECK
POINT

Instruments:

Smart Contract Weakness Classification and Test Cases [SWC-[100:136]]
Common Weakness Enumeration [CWE]
OWASP Risk Rating Methodology

Audit Results

Risk Level:

○ Weakness   ○ Low   ○ Medium   ● **High**   ○ Critical

1
The owner of contract can grant any wallet address Admin rights, which allows users to set various variables in the ecosystem

2
Any authorized admin can to modify a 'liquidity fee', a 'buyback fee', a 'market fee' and a 'reflect fee' to any percentage at any

3
Any authorized admin has ability to set a tax limit and fee recievers

4
This essentially makes the token become a honeypot to that address, and makes transferring any native tokens impossible

We strongly recommend that CrypterToken conduct Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
