OWASP Risk Rating Methodology

CHECK
POINT

Audit Results

Risk Level:

○ **Weakness**   ○ **Low**   ● **Medium**   ○ **High**   ○ **Critical**

1
The owner of the contract can blacklist wallets from purchasing or selling the coins they hold

2
The owner can to modify a 'ALPACA fee', a 'marketing fee' and a 'liquidity fee' to any percentage at any time

3
This might deter investors as they could be wary that these fees might one day be set to 100% to force transfers to go to the owner

4
DoS with Block Gas Limit

Consider removing the «exclude Multiple Accounts From Fees» function

We strongly recommend that Baby Alpaca conduct a Full Token Security Audit to ensure trust in the team as they have notable control within the ecosystem
